# Sora
The student reading app

The Sora app makes reading accessible for your students
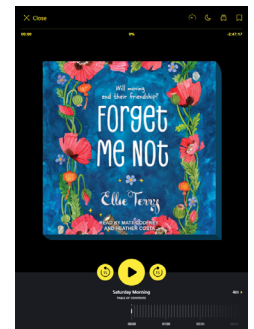

READING PERSONALIZATION

Sora offers ebook customization settings like adjustable font typefaces and sizes (including dyslexic font), and different screen lighting options. Plus, students can personalize their audiobook and read-along experience by adjusting the narration playback speed.

HIGH CONTRAST

High contrast mode is also available in Sora's interface and in its ebooks. For those with low vision, high contrast options can improve readability and app navigation.

SCREEN READER SUPPORT

We follow WCAG guidelines to make Sora accessible. This includes skip links, alt text, labeled elements, logical tabbing order, and much more.

Sora should work with most screen readers, but we test on:

- Android Accessibility Suite
- ChromeVox
- JAWS
- NVDA
- VoiceOver
