

Digital Libraries for Corrections Facilities

Provide ebooks and audiobooks for your incarcerated people in a secure, controlled environment for education and rehabilitation.

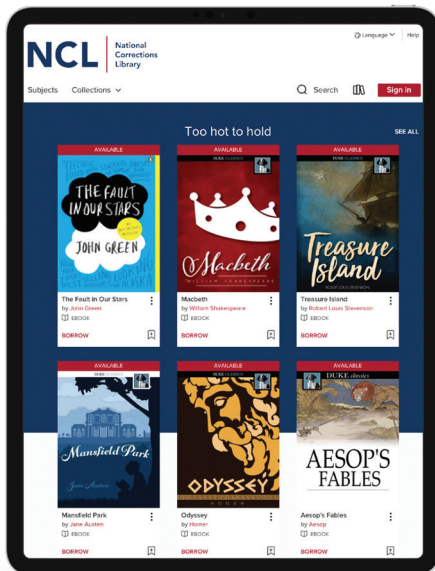

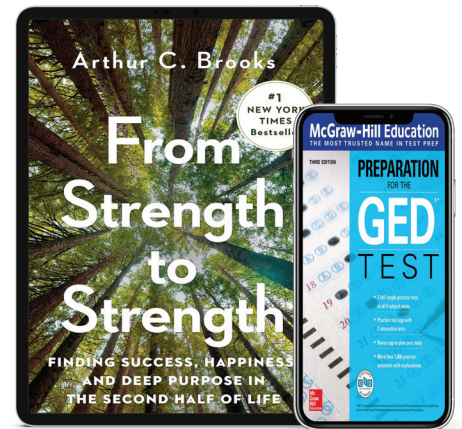

The market leader in digital library solutions for institutions, OverDrive works with prisons, jails and corrections facilities to meet contract requirements for local, state and federal agencies. A digital library is a cost-effective resource to support education, rehabilitation, reduce recidivism, and support mental health, spiritual or addiction needs. It's a safe and secure way to supply your incarcerated individuals with the highest caliber of self-paced digital learning and leisure materials alongside robust, easy-to-use administrative and reporting tools.

HOW IT WORKS:

CATALOG

The OverDrive catalog offers ebook and audiobook titles as well as magazines and comics in a wide variety of subjects. OverDrive has the most current titles as well as inexpensive collections of classics. And, unlike physical books, which can be costly due to expenses related to procurement, storage, and maintenance, our OverDrive's digital library is easy to maintain and make it simple to grant and revoke privileges on the fly.

OverDrive works with your system to offer assistance in curating a collection of appropriate and permissible content that meets any local, state and federal mandates. A variety of lending models also allows your institution to maximize access and reduce cost.

TECHNOLOGY

OverDrive works with several secure tablet providers to add a digital library option to the available media services correctional users are allowed to access. And most importantly, OverDrive understands the need to have a secure system and works with a variety of authentication methods.

See why an OverDrive digital library is the only trusted resource that can provide institutions of any size access to ebooks and audiobooks.
