All collections

Create curated or automated collections of titles you own and publish them on your OverDrive website. This is a great way to showcase the content in your digital collection and boost circulations for included titles.

"Published collections" are all collections (curated or automated) that are currently live on your site. "Draft collections" are drafts of curated collections that are not currently live on your site.

To begin creating either a curated or automated collection, click the **Create collection** button.
