Definition of Literacy in a Digital Age

NCTE's Defin[...]ent, and teaching prac[...]

> "As society and technology change, so does literacy."

Literacy has always been a collection of communicative and sociocultural practices shared among communities. As society and technology change, so does literacy. The world demands that a literate person possess and intentionally apply a wide range of skills, competencies, and dispositions. These literacies are interconnected, dynamic, and malleable. As in the past, they are inextricably linked with histories, narratives, life possibilities, and social trajectories of all individuals and groups. Active, successful participants in a global society must be able to
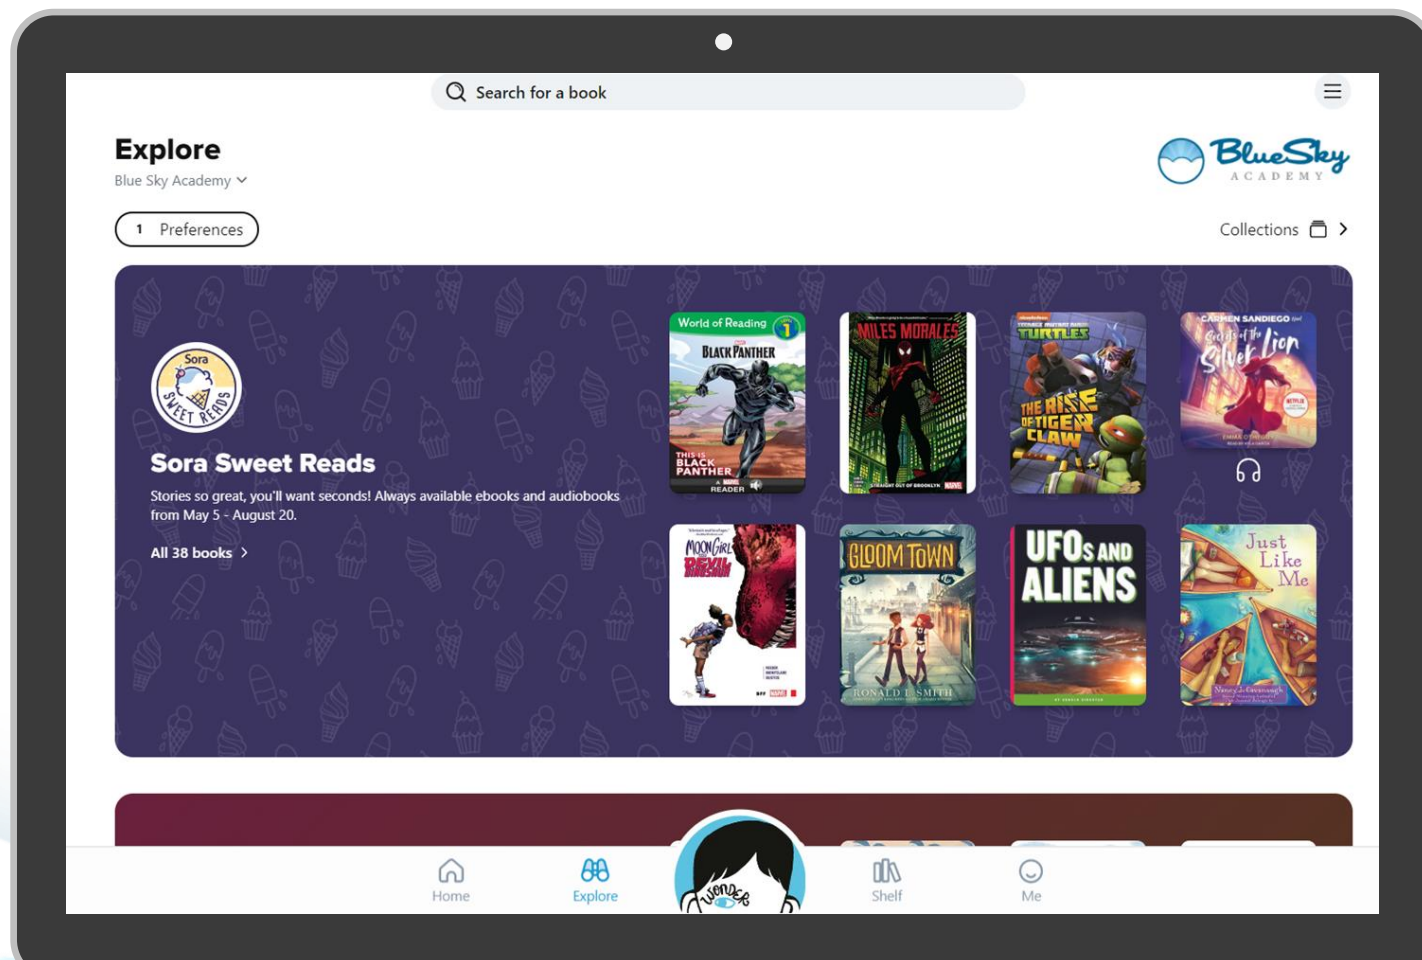

- Participate effectively and critically in a networked world;
- Explore and engage critically, thoughtfully, and across a wide variety of inclusive texts and tools/modalities;
- Consume, curate, and create actively across contexts;
- Advocate for equitable access to and accessibility of texts, tools, and information;

We provide a variety of digital content to students but don't have a plan to select, organize and deliver multiple media types that support students.
