

Reserving & Bundling Books

Flexible new feature ensures the right students have access to the right titles

This exciting and highly requested feature lets educators reserve and bundle titles from the general collection in the Sora reading app to offer exclusive access for specific students or scenarios.

How does it work?

- 1 **Reserve titles** to remove them from the main collection.
- 2 **Create bundles** from your pool of reserved titles.
- 3 **Claim bundles** to receive the Sora access code.
- 4 **Share access codes with students** to let them unlock books in Sora.

The flexibility of this feature can help you meet a variety of reading needs. Here are a few examples of how you might use content bundles:

- Bundling ELA curriculum titles for a school year
- Creating a teacher-specific classroom library
- Grouping books for topic or grade-level theme sets
- Reserving titles for upper grade levels
- Making On-Demand Class Sets available only to students who need them for class
- Building a professional development collection accessible to teachers only
- Organizing books for book clubs or lit circles
