# Watch reading grow with the student dashboard

## Sora
Where students read

When it comes to measuring literacy, it's important to have accurate insights into your students' reading engagement—insights you can't always get with print. **What if you could access data to help you:**

- See student reading stats in real-time
- Form intervention strategies
- Make book purchasing decisions
- Identify usage trends

**The student dashboard empowers you to dive deeper into how your students are reading in Sora!**

## What data does the student dashboard show?

From the dashboard landing page, you can view summary data for each student, including:

- Number of books opened
- Time read
- Number of reading sessions
- Number of active days
- Average time per session
- Average time per book
- Achievements earned
- COMING SOON: Daily reading goals

## How does the student dashboard work?

| **1** | **2** | **3** | **Use rostering in Marketplace?** |
|---|---|---|---|
| Enable the student dashboard in OverDrive Marketplace.* | Create classes of students to view their reading data.* | Repeat! You can create as many classes as you'd like and add students to multiple classes. | You can enable automatic syncing so that the dashboard reflects schedule changes in real time! |

*specific Marketplace permissions required

## How long is data available?

Your school can choose whether to retain reading data for up to two years.

## What about Advantage accounts?

Great news! If your school belongs to a shared collection and maintains an individual Advantage account, you can set up and customize your own student dashboard.

### How do I get started?

For student dashboard how-tos, check out **Marketplace Help** resources.

For other questions, contact your **Account Manager** or **asksora@overdrive.com**
