PRODUCT ENHANCEMENTS

Sora updates

Educator feedback informs the latest and greatest Sora updates, designed to help students read more and achieve success in the classroom and beyond.

- **NEW! Reading Goals:** This feature encourages students to take ownership of their reading goals and rewards their progress along the way. Reading Goals give students the power to transform their literacy engagement by setting daily goals, measuring their real-time reading stats and unlocking exciting new milestones. (Plus, educators can access real-time Reading Goals data in Marketplace's student dashboard.)

Reading Goals

NEW STUDENT DASHBOARD DATA

Schools using OverDrive Marketplace's student dashboard to monitor reading data can now gain insights from a variety of new tools. Four new charts show reading progress over time for a specific class or classes, including day-over-day or month-over-month options. A new "Activity by class" section lets educators compare engagement by class with data points like minutes spent reading, number of reading sessions, active readers, and more.

TeachingBooks®

INTRODUCING A NEW INTEGRATION FROM TEACHINGBOOKS

Pairing TeachingBooks resources with books in Sora is now easier than ever! With our new integration, you can seamlessly access any book in your Sora collection directly from TeachingBooks. Just look for the Sora icon!

Contact your Sora Account Manager or schools@overdrive.com to learn more about how you can use Sora to remove barriers to reading!
